

On-farm training organized for technology demonstration of Scientific Kharif Crop Production technologies in Bilara and Luni tehsils

On-farm training on Scientific Kharif Crop Production technologies was organized in Pichiyak and Kalauna villages in Bilara tehsil and Melva village in Luni block on 20 & 21 June, 2024 respectively. A total of 39 farmers and farm women participated in the program. Seeds of improved varieties of Greengram (var. IPM 205-7/ Viraat) and Guar (var. RGC 936) were distributed to these farmers for organizing technology demonstrations at their farms in upcoming kharif 2024. Dr. Dipika Hajong informed farmers about the improved technologies developed by CAZRI for arid zone farmers and advised them to adopt these technologies. Method of seed treatment of kharif crops with Marusena-1 for control of soil-borne diseases was demonstrated to the farmers. Sh. Omprakash Choudhary, Agriculture Supervisor of Pichiyak and Kalauna villages also participated in the program and. The program was coordinated by Dr. Dipika Hajong and Sh. Jugal Kishor.
