

Farmers training programme organised at CAZRI Regional Research Station Jaisalmer

One day farmers training programme was organised on 22.02.2023 at CAZRI Regional Research Station Jaisalmer. This training was organised under the Seed Asacoder–DST Project on Improvement of water productivity in khadin system for crop production implemented by CAZRI Jodhpur. The main objective of this training programme was to Improve water productivity and farm income in hyper arid region. In this training, about 40 farmers participated from Masurdi, Lanela, Damodara and Basanpeer villages. In this training, Dr Akath Singh Principal Scientist from CAZRI Jodhpur emphasized on climate based horticultural crops including ber and pomegranate. Dr S.P.S. Tanwar highlighted the importance of livestock in integrated farming along with fodderbeet and other fodder crops. Dr P. santra stressed upon the rainwater harvesting based cultivation utilising solar energy. Scientists of CAZRI RRS Jaisalmer Dr S.C. Meena, Dr Abhishek, Dr Anil Patidar, Dr D.K. Dangi and Dr Saranya underlined the international year of millets and different insect-pest and diseases. Shri Ubdeullah, Sumit Kumar and Roshan Lal provided the technical help for making this programme successful.
